Hazard Identification and Initial Risk Level Classification

Within the department, review the work area or tasks that are undertaken. Consider the **significant** hazards in the work area or within the task or job. Observe all the work area or how the task is undertaken. When conducting this assessment, ensure you consult personnel who work in the area or who are involved in or may be involved in the task. Allocate a risk rating and consider if the risks are adequately controlled.

Step 1 IDENTIFY THE HAZARDS												
1	Slips & Trips	6	Storage, space & obstructions	11	Use of vehicles & buggies/driving at work	16	Fire hazards	21	Food preparation/allergens	List any specific Hazards:

26	Spread of Covid-19 Coronavirus	Members, Guests & Staff	<p>Social Distancing</p> <p>Workplaces should make every reasonable effort to comply with the social distancing guidelines set out by the government - 2m, or 1m with risk mitigation. Where 2m is not viable, you should consider and set out the mitigations you will introduce.</p> <p>Further mitigating actions include:</p> <ul style="list-style-type: none"> Further increasing the frequency of hand washing and surface cleaning. Keeping the activity time involved as short as possible. Using screens or barriers to separate staff from each other and staff from customers at points of service. Using back-to-back or side-to-side working (rather than face-to-face) whenever possible. Reducing the number of people each person has contact with by using 'fixed teams or partnering Finally, if people must work face-to-face for a sustained period with 	M	✓		<p>Staff to be reminded daily of the importance of social distancing both in the workplace and outside of it.</p> <p>Management/Duty Manager checks to ensure compliance.</p>

If you have identified that there is a need for any specific risk assessments to be completed, **list these in Step 3 below**

Risk Matrix – calculate the level of risk (High/Medium/Low), using the likelihood and severity risk matrix

		SEVERITY				
		Nil 1	Minor 2	3-day 3	Major 4	Fatal 5
LIKELIHOOD	Very likely – 5	5	10	15	20	25
	Probably - 4	4	8	12	16	20
	Possible – 3	3	6	9	12	15
	Remote – 2	2	4	6	8	10
	Improbable – 1	1	2	3	4	5

LEVEL OF RISK	ACTION AND TIMESCALE
High	You should not start work until the risk has been reduced. You may have to set aside considerable resources to reduce the risk. If the risk involves work in progress, you should take urgent action. If it is not possible to reduce the risk even with unlimited resources, you must stop all work.
Medium	You must try to reduce the risk, but should carefully measure the cost of prevention. You should use measures to reduce the risk within a defined time period. If the medium risk is associated with extremely harmful consequences, you may need to carry out another assessment to identify more precisely the likelihood of harm. This will help you decide whether you need to use improved control measures.
Low	You don't need to take action at this time. Monitoring is necessary to make sure that the controls are still effective and being used by those involved.
